

04-P83 11.6m High Speed Patrol Boat

The design is a "deep vee" surface piercing monohedron of the proven "Delta" type with a long soft entry fairing to a 20 degree deadrise body. A built in strake at the chine provides lift and deflects spray. The low resistance and sure handling characteristics of these hulls ideally suit the boat's duty. Explosion resistant fuel tanks and composite ballistic panels in the wheelhouse further add to a competent patrol vessel.

PARTICULARS

Length Overall (HULL):	11.6 m
LWL:	9.97 m
Beam (Max):	3.22 m
Beam (Moulded):	3.0 m
Design Draft:	.475 m
Fuel Capacity:	975 litres
Performance:	47kts @ trials displ.
Propulsion:	Yanmar 6LY-STE (420 bhp@3300 rpm) driving Hamilton HJ292 waterjets.
Survey/Class:	Lloyds SSC
