

07-64B 12m High Speed Patrol / Assault Boat

The design is a "deep vee" surface piercing monohedron of the proven "Delta" type with a long soft entry fairing to a 19 degree deadrise body. A built in strake at the chine provides lift and deflects spray. The low resistance and sure handling characteristics of these hulls combined with waterjet efficiency ideally suit the boat's duty.

Explosion resistant fuel tanks and composite ballistic paneling add to a competent patrol vessel. 9 litre class engines may be fitted to further increase performance.

PARTICULARS

Length Overall:	12.0 m
LWL:	9.5m
Beam (MLD) :	3.07m
Design Draft (Hull):	.44m (Lightship)
Complement:	11
Fuel:	800L
Propulsion:	2 off YANMAR 6LY3A-STP (440bhp@3300rpm) driving Hamilton 292 w/jets through ZF280-1 gearboxes.
Survey/class:	Lloyd's SSC
